Attendees:

- The Management of Major Emergencies course is designed for personnel who have emergency response management duties or are members of an emergency response team within a Corporate Emergency Operations Centre (CEOC) at an organizations corporate headquarters. Typically, the CEOC provides support to an Emergency Operations Centre (EOC) at a facility, plant or other location. Courses can be conducted for the Private Sector, all levels of Government (Federal/Provincial/State and Local) and industries such as Oil and Gas, Aviation, Marine, Mining, Pulp and Paper and Utilities etc.

Course Objectives

- To provide a concise understanding of the roles, responsibilities, and procedures to be followed during emergencies.
- To introduce the concepts of command and control (emergency management) as applied from a CEOC.
- To demonstrate the effectiveness of an information system, suitable for collecting and displaying critical information during an emergency:
- To provide initial training for personnel seeking formal competency assessment as an Emergency Manager.
- To provide non-operational support staff with an overview of how emergencies are managed.
- To provide each attendee with the confidence to demonstrate, through simulation, his or her ability to manage emergencies.

Student Experience and Qualifications Requirements

While previous emergency management experience is not a requirement for attendance, students with limited or no experience are advised to study the basic concepts of emergency preparedness prior to attendance.

- 5 years technical teaching experience
- 5 years emergency management experience
- Qualified in assessment

Required number of students per course

8

Training Schedule

0900 to 1700 - Monday to Friday

Venue

Internationally or in Canada.

Dates & Cost

Courses are conducted on an as required basis. Cost is subject to location and additional client requirements. Travel, preparation, customisation, consultancy and technology transfer are not included.

Technology Transfer

Clients with established training centres, or departments, can participate in a technology transfer program that enables Seacom International Inc. to train and certify the clients designated instructors and assessors. Certified instructors and assessors can then present the Management of Major Emergencies course, and others, utilising Seacom's training materials and technology. Upon completion of the technology transfer program, normally 12 months, companies can eliminate the need to rely on external training support while enhancing their internal capabilities and image as a leader in the field emergency management.
